Round table: E-ARK specifications in the National Archives

Participants

- Jan Dalsten (Denmark)
- Silvia Trani (Italy)
- Zbyšek Stodůlka (Czech Republic)
- Violette Lévy (France)

Opening round

Presentation of experiences with implementing E-ARK products (specifications, software tools, reference architecture) in national environment.

The E-ARK Project as a “support”: when and why

- **2018:** The Central State Archive of Italy received the specific mandate to create the «Digital Archive of the Italian State» («Archivio digitale dello Stato italiano»)
 - the existing Italian digital preservation scenario had to be implemented to satisfy the permanent archival digital preservation requirements
- **2019:** The eArchiving workshop
- **2021:** The «Italian Digital Preservation Repository» («Polo di conservazione digitale-PCD»): sub-measure M1C3 1.1.8 *Italian Recovery and Resilience Plan*:
 - The «Intermediate Digital Preservation Repository of the Italian Ministry of Culture» («Archivio digitale intermedio del Ministero della cultura-ADIMiC»)
 - The «Italian State Archives Digital Preservation Repository» («Polo di conservazione digitale degli Archivi di Stato-PCDAS»)

The E-ARK Project products: use

- **E-ARK technical specifications**

- **Information Packages**

- Common Specification for Information Packages (CSIP)
 - E-ARK SIP, E-ARK AIP and E-ARK DIP Specifications

- **Content Information Type Specifications**

- Specification for the E-ARK Content Information Type Specification for Electronic Records Management Systems (CITS ERMS)
 - Common Specification for Archival Information (CS Archival Information)
 - Common Specification for Preservation metadata (CS PREMIS)
 - *SIARD and Content Information Type Specification for Relational Databases using SIARD (CITS SIARD) + Database Preservation and Visualization Toolkits*

The E-ARK Project products: customizations

- *Conceptual and Functional Model* influenced by the Italian juridical context
- *Software platforms*
- **Metadata Profiles**
 - EAD (e.g. Electronic Records - Complex and Simple - and Files; Archival Levels)
 - EAC-CPF (Producers, Internal/External Submitting Organisations, Creators, Control Authority)
 - EAG (Institution with archival holding)
 - PREMIS (e.g. Intellectual Entities, Significant Properties)
 - METS
- **Models of the Information Packages**
 - SIP (e.g. Electronic Archival Serie; Electronic Files – simple or structured into sub-files)
 - AIP (e.g. archival resources; context)
 - DIP (e.g. simple; juridical)

Context AIP: an example

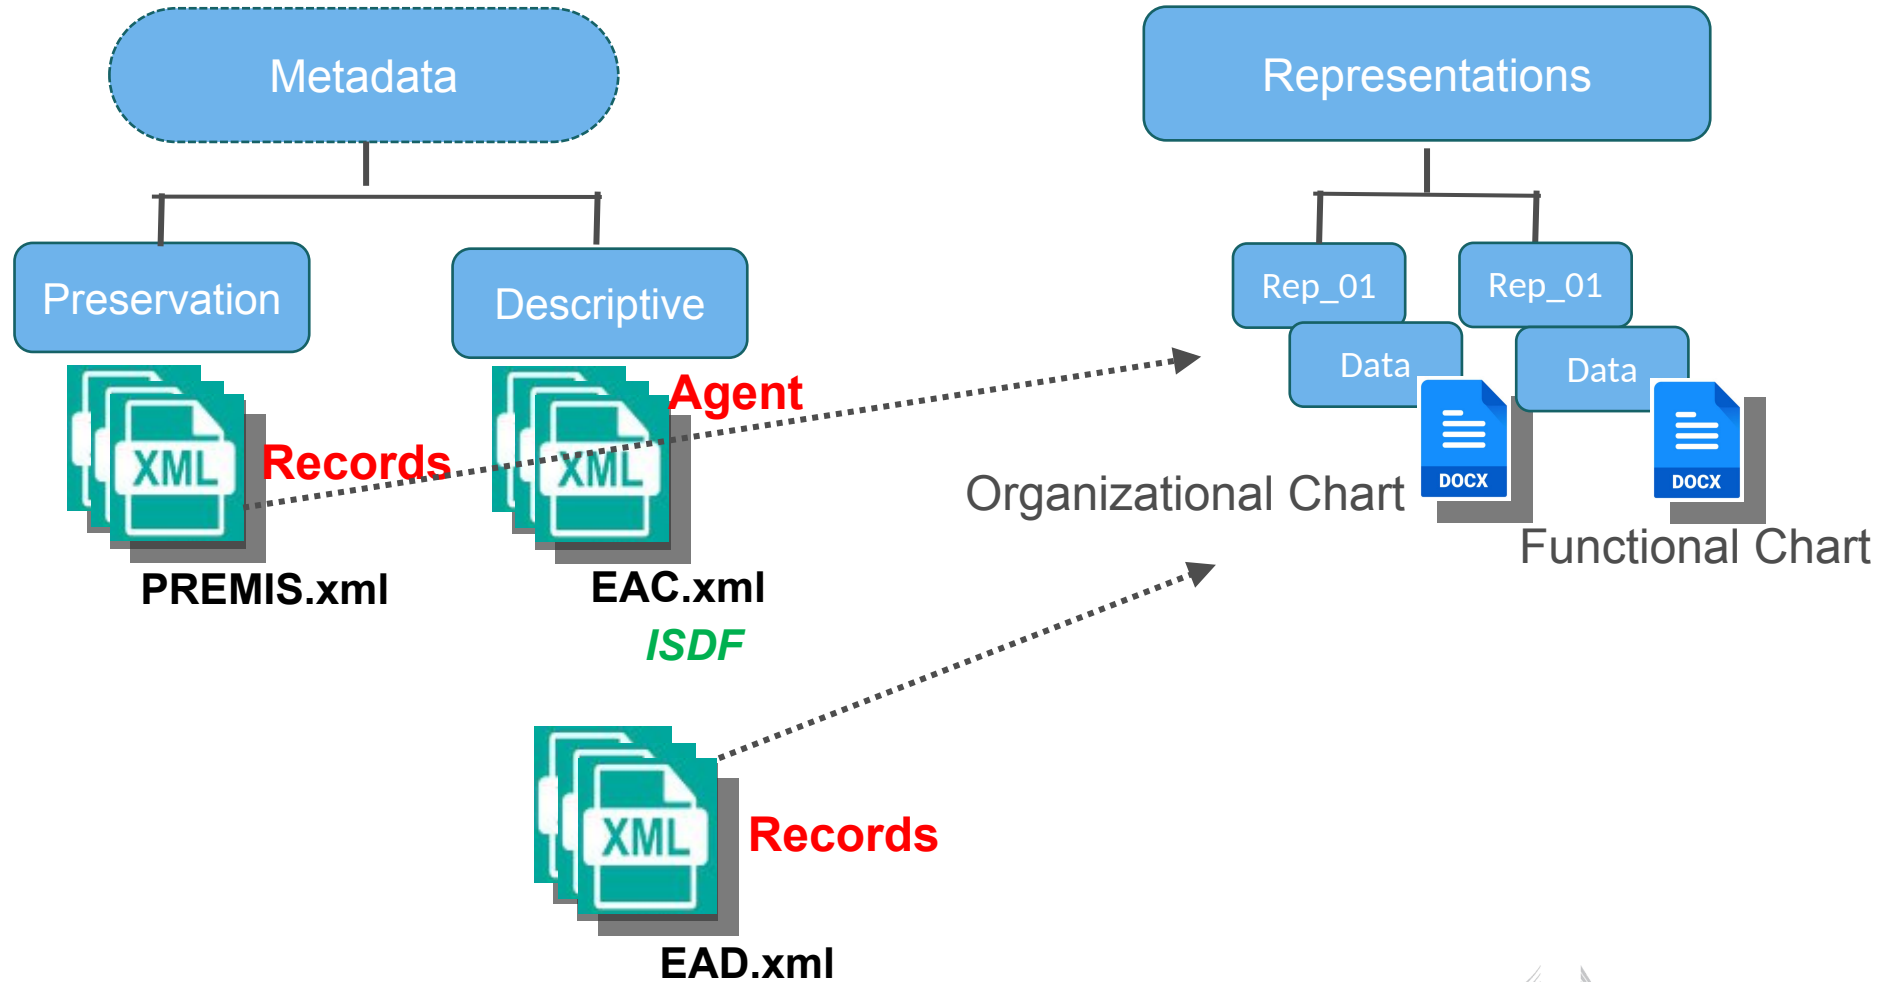

Context AIP: Agents

Model 1: e.g. Producers, Internal/External Submitting Organisations, Creators

Basato sul modello eArchiving

eArchiving Reference Architecture v. 1

Opening round

Presentation of experiences with implementing E-ARK products (specifications, software tools, reference architecture) in national environment.

Second round

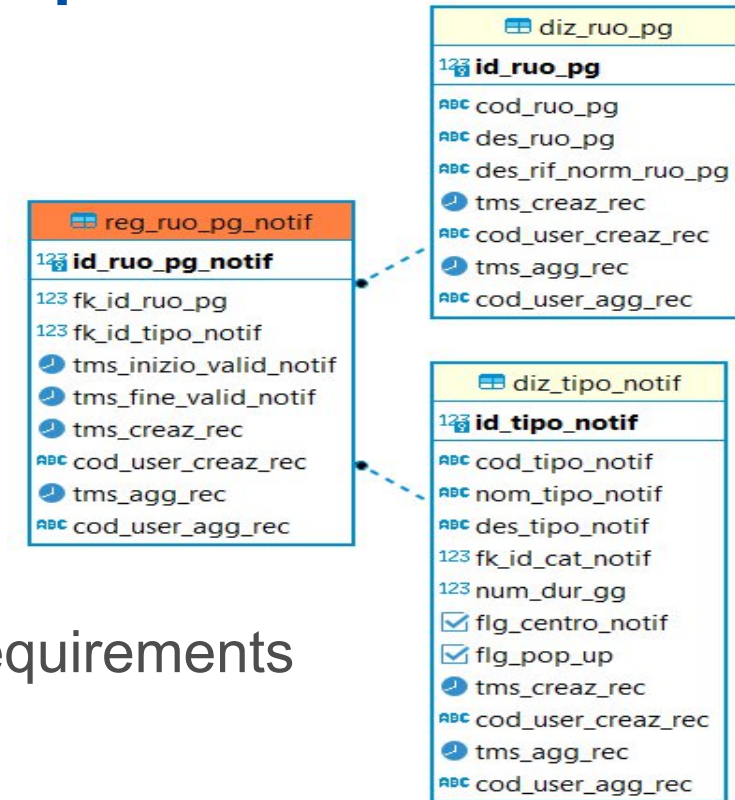

Given the eArchiving initiatives serve a wider audience beyond national archives, how can future developments ensure accessibility and usability for all archiving service providers?

The E-ARK/eArchiving products: other public and private archives

- Focus on the long-term archival digital preservation not on the juridical profiles «Agents»
- Can be used in a selective way without compromising the value and the value and quality of the E-ARK Model

The E-ARK/eArchiving: the development of new solutions and services

- periodical meetings to discuss a specific critical points
 - metadata for Agents, Events and Objects (logical and physical)
 - disposal and destruction digital archives
 - manage «lifecycle» AIPs
- Access Service (e.g. the Digital Asset Management-DAM requirements and the Digital Library Model) and Virtual Reference Service

Second round

Given the eArchiving initiatives serve a wider audience beyond national archives, how can future developments ensure accessibility and usability for all archiving service providers?

Third round

Your Questions Are Welcome!

Thank you
