Welcome to the live webinar

Start 10:00 (CET)

10 June 2021

Ground Rules for the Live Webinar

Click on “Connect audio” to hear the presenters but please mute your microphone throughout the webinar.

Submit your questions in writing by using the Webex chat function. We will answer some questions live during the webinar and provide written answers to all (within the coming days).

Please note that this webinar is recorded.

Agenda

10:00 – 10:15
Welcome to CEF and eArchiving
Thomas Fillis –
Dr. Jaime Kaminski – CEF eArchiving training activity lead

10:15 – 10:40
eArchiving and validation requirements
Björn Skog – CEO and senior preservation strategist

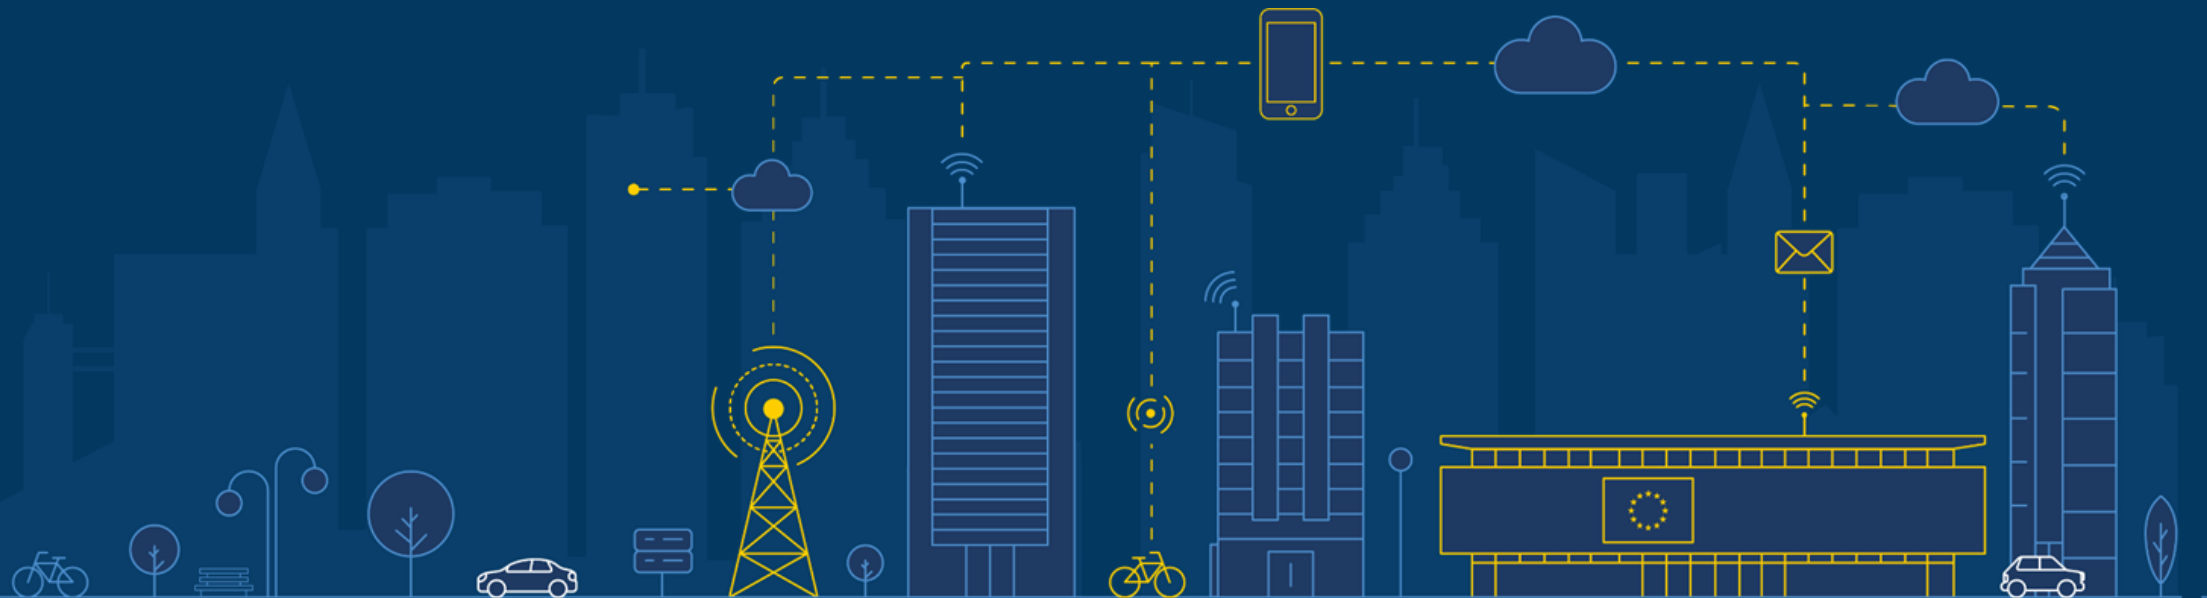
10:40 – 11:00
eArchiving and validation software tools
Björn Skog – CEO and senior preservation strategist

11:00 – 11:15
Q&A

11:15
Close

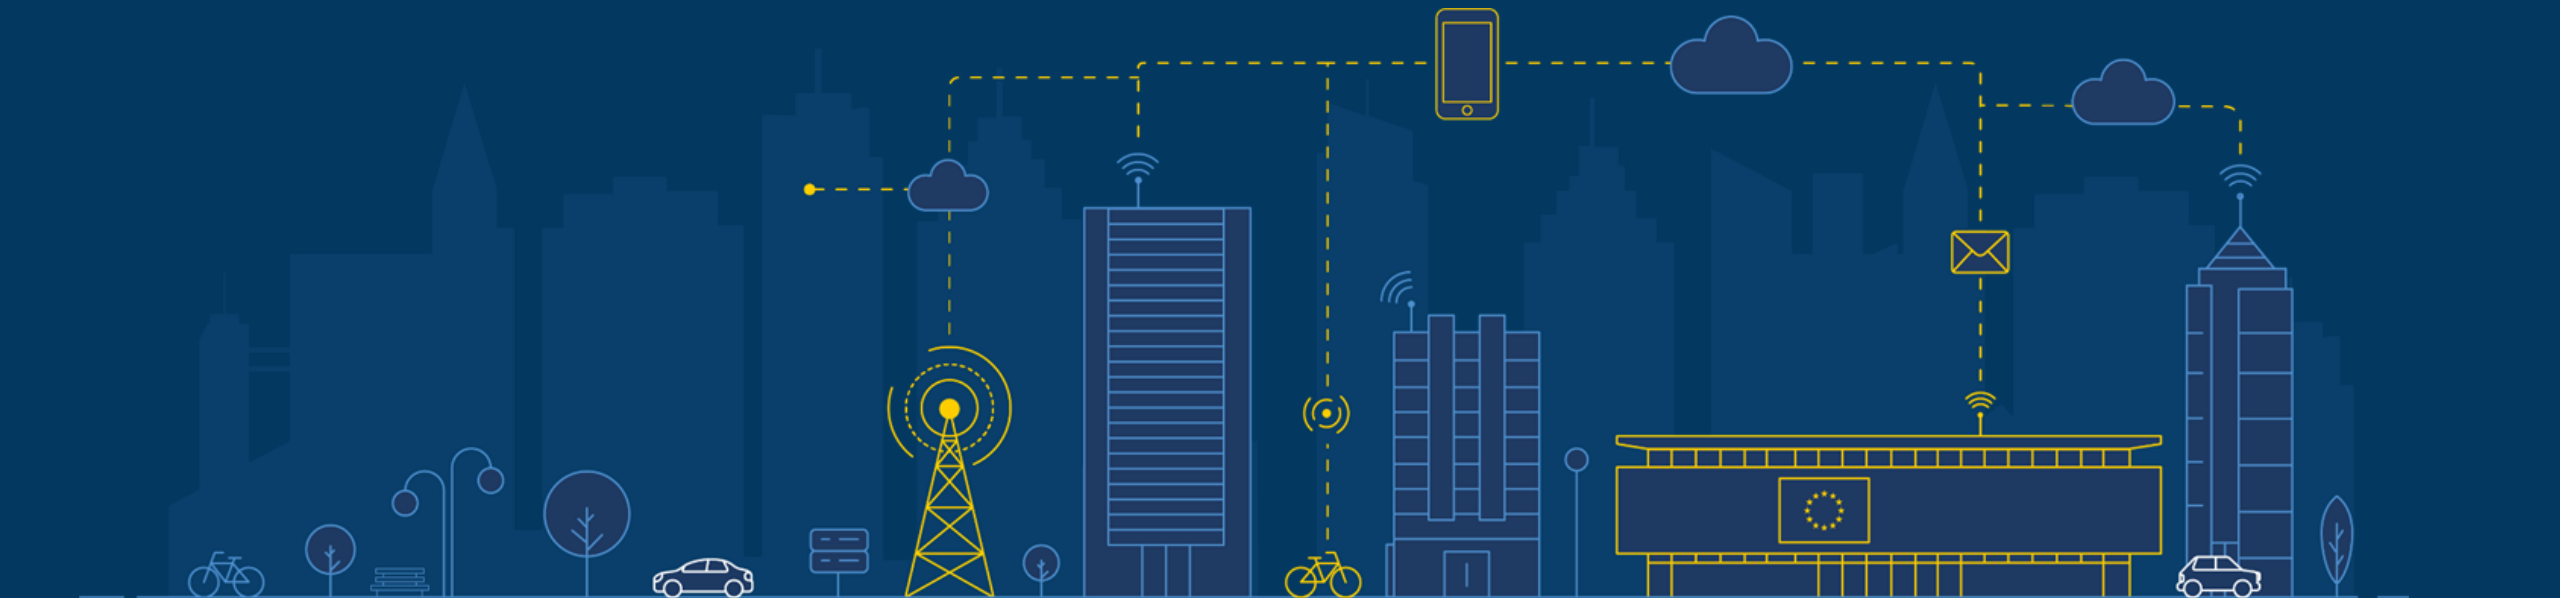
Welcome to CEF and eArchiving

Dr. Jaime Kaminski
CEF eArchiving activity lead training



Practical applications of digital archiving - validation

Björn Skog
CEO and senior preservation strategist – ES Solutions



ESSArch

eArchiving

A solution for individuals, organisations and systems

https://github.com/E-ARK-Software/ESSArch

Validation – why?

"the act of conforming something as true or correct"

could mean secure objects not to be changed, destroyed or lost, fixity checks can be used to ensure integrity

could mean compliance with standards, rules or laws

could mean solid procedures and routines that can ensure integrity, conformity, confidentiality and security

could mean confidentiality about protecting data against unintentional, unlawful, or unauthorized access, disclosure, or theft

A solution for individuals, organisations and systems

https://github.com/E-ARK-Software/ESSArch

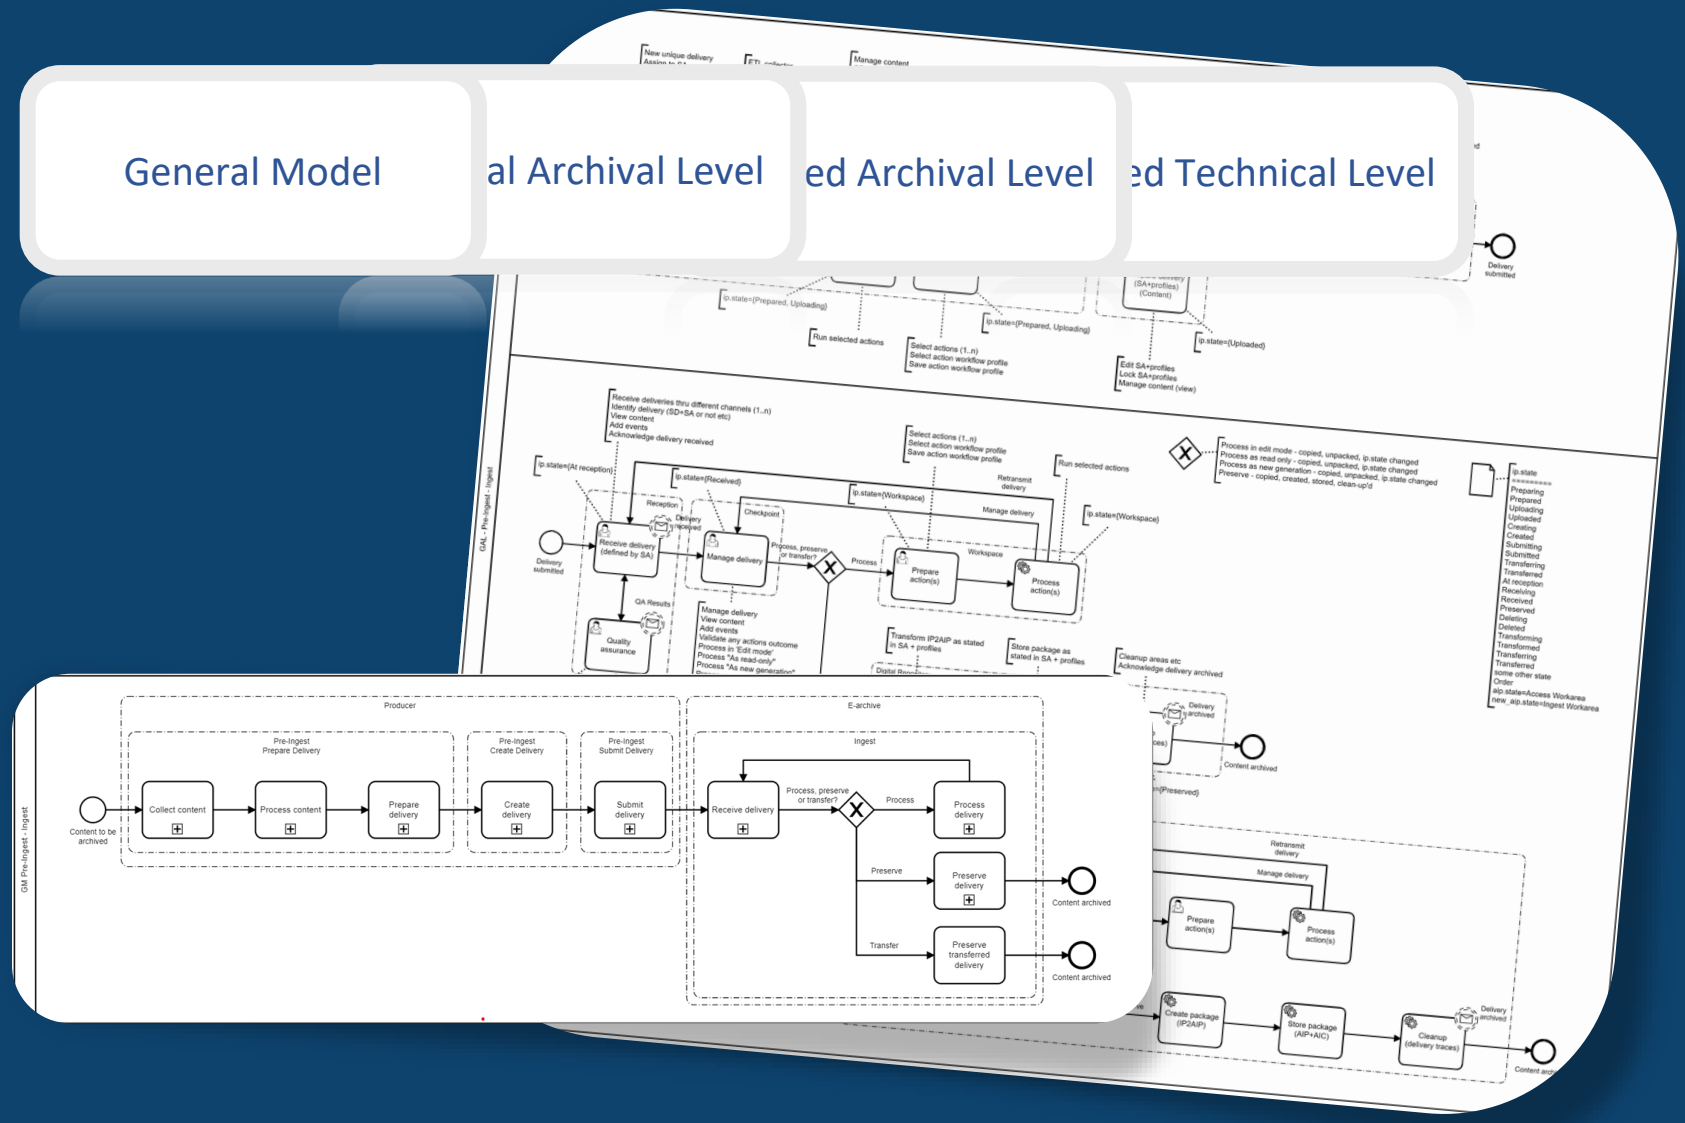
Validation – when?

General Model | al Archival Level | ed Archival Level | ed Technical Level



ESSArch

eArchiving

A solution for individuals, organisations and systems

https://github.com/E-ARK-Software/ESSArch

Validation – how?

Who will perform what, how and when in the archival workflow?

What sort of actions and tools can be used?

Sequences of validation tasks and/or steps?

Automatic, semi-automatic or manual, or a combination?

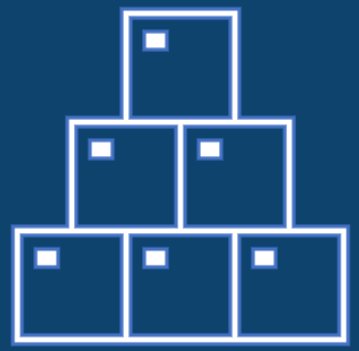
ESSArch

eArchiving

A solution for individuals, organisations and systems

https://github.com/E-ARK-Software/ESSArch

Validation – software?



Software tools as plug-ins, standalone, as modules or single components?

Open source or proprietary validation software – can they be combined?

MoSCoW principles to address required set of validation software?

Iteratively evaluate validation requirements and abilities (existing / non existing)

"Remember – failures and mistakes gives you to ability to evolve"
